

## Key Features

- Completely wireless operation ✔

---

- Category 1 radio receiver ✔

---

- Designed to be ceiling mounted ✔

---

- Independently tested to ETSI-300-220-1 ✔

---

- CE RoHs and EMC compliant ✔

## Overview

The Evacuator Synergy series of temporary wireless fire detection system provides an ideal solution for protecting construction sites from fire. The Evacuator Synergy heat detector is the perfect addition to any wireless manual site alarm system. This Evacuator Synergy heat detector can wirelessly interlink with up to 40 other devices using built-in radio frequency technology. It is powered purely by batteries and requires no wiring whatsoever.

The Evacuator Synergy heat detector is designed for ceiling mounting and is for indoor use only. These detectors provide an early warning of fire and, when activated, triggers all non-detector site alarms on the network. These detectors provide low battery and out of RF range warning to ensure continuous and reliable operation.

Please note: Heat Detectors offer no extra alarm noise on-site, they act only as a detector.

## Tech Specs

Weight	1.6 kg
Dimensions (W x H x D)	150mm x 200mm x 100mm
Power Source	9Vdc

## Ordering Information

Part Number	Description
FMCEVASYNHD	Evacuator Synergy Heat Detector
