

Key Features

- Suitable for use with FAAST FLEX ✔

- Vandal Resistant ✔

- IP66 Enclosure ✔

- Wall Mounting ✔

- Simple Installation ✔

Overview

To complement the FAAST FLEX, an IP66 vandal resistant enclosure is available. This enclosure is built to accommodate either a one or two channel FLEX unit. The enclosure has a hinged key lock door to avoid unwanted access, and is supplied with pre-drilled holes for inlet and exhaust ports and cable entries so that installation of a detector is a simple process requiring minimal tools.

The enclosure is supplied with pipe fittings and glands to ensure that the IP66 integrity of the enclosure is maintained. Wall fixing brackets and blanking caps are also included.
