

Key Features

Compatible with Wi-Fyre Xenos

Enables Wireless management and diagnostics

Communication range up to 200m in open air

Uses standard low-cost alkaline AA battery technology

5 years product warranty

Overview

The Wi-Fyre Xenos Wireless Dongle is an interface device that is used to connect a PC or tablet to a Wi-Fyre Xenos wireless fire alarm system. The dongle links to a Wi-fyre Xenos Translator or Expander module to provide bi-directional wireless communication. This allows the connected PC or tablet to be used for system management and diagnostic purposes. This can then be used in place of using a hardwired connection.

The Wi-Fyre Xenos Wireless Dongle is compact and easily portable. It can be powered by USB cable or by two low-cost alkaline AA battery batteries.

Tech Specs

Operating Frequency	868 – 870 MHz
Max Radiated Power	14dBm (25mW)
Weight (without batteries)	100g
Batteries	2 x AA (1.5 V)
Dimensions (W x H x D)	117mm x 79mm x 24mm
Operating Temperature	-10 to +55°C
Humidity (Non Condensing)	95% RH
