

Key Features

- Provides additional support for LHD cable ✔

- Suitable for indoor and outdoor applications ✔

- Provision for cable ties ✔

- Easy to install ✔

- Compliant with BS5839:1 requirements ✔

Overview

The Fyreline J-Clip is a durable stainless steel attachment designed to offer extra reinforcement for LHD cables. Its ingeniously crafted design features a slot for securing a cable tie, ensuring a secure fit onto the J-Clip. This versatile J-Clip can be employed to support various types of heat detection cables, such as FyreLine Digital, EN54 Fixed, and Analogue linear cables, whether positioned above or below the hazard zone. It is particularly suitable for flat surfaces and is crafted from high-quality galvanized steel.

Stainless steel mounting components are appropriate for both indoor and outdoor applications. Each package includes silicone sleeves, which serve to insulate and shield the LHD cable from potential abrasion, excessive pressure, and heat transfer from metal mounting brackets. Such protection is crucial to maintain optimal cable performance.

Tech Specs

Material	Stainless Steel
Dimensions (W x H x D)	20mm x 50mm x 20mm
Weight	16g
