

Key Features

3rd party switching

Designed and manufactured in the UK

Flush or surface mount

Light grey finish

LED Indication

Overview

An emergency assistance alarm is designed to alert others or request help in an emergency situation. Emergency assistance alarms are particularly beneficial for elderly individuals or those with medical conditions who require immediate assistance in case of accidents or health emergencies.

The Crisis Assist Disabled Toilet Alarm Relay Module provides the facility to connect third-party switches, such as switch strips, door microswitches or similar non-latching or latching switches, to a Crisis Assist system.

It can accommodate up to four devices, each with its own identification label and individual LED status indication. It is housed in a light grey enclosure that is designed to fit a standard double-gang back box and uses standard two-core cable to provide easy, low-cost installation.

Tech Specs

Standards	BS 8300-2:2018 EMC:EN 55035:2017+A11:2020 and EN 55032:2015+A1:2020 LVD: EN IEC62368-1:2020+A11:2020
